DERANSIYA DORIN J

Aspiring Cloud Architect | AWS · Linux · DevOps · Python · Cloud Infrastructure

Dindigul, Tamil Nadu | 7598198386 | deransiyadorinj@gmail.com | linkedin.com/in/deransiya-dorin-j-a63185353 | github.com/deransiyadorinj

PROFESSIONAL SUMMARY

Aspiring Cloud Architect and Cloud/DevOps Engineer with hands-on experience in AWS cloud infrastructure, Linux administration, enterprise networking, and DevOps automation. Skilled in designing scalable, secure, highly available architectures using AWS (EC2, S3, IAM, VPC, CloudWatch), containerization (Docker, Kubernetes), and Infrastructure as Code (Terraform). Experienced in TCP/IP networking, DNS, routing and switching, VLAN segmentation, and network security using Cisco Packet Tracer and GNS3, along with Python scripting and Git/GitHub version control. Holds 9 industry certifications in cloud, networking, and cybersecurity, maintains a 9.16 CGPA, and has built hands-on cloud, network, and full-stack projects.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, IAM, VPC, Route 53, CloudWatch, SNS), Elastic Load Balancer, Auto Scaling, Cloud Networking, High Availability, Disaster Recovery, Cloud Security, Identity & Access Management, IaaS/PaaS/SaaS

Networking: TCP/IP, OSI Model, IPv4, IPv6, Subnetting, VLAN, Inter-VLAN Routing, OSPF, Static Routing, NAT, ACL, DHCP, DNS, VPN, STP, Routing & Switching, Network Troubleshooting, Network Security

Programming: Python, SQL, HTML, CSS, JavaScript, Bash/Shell Scripting

Tools: Git, GitHub, GitHub Actions, Jenkins, Docker, Kubernetes, Terraform, Cisco Packet Tracer, GNS3, Wireshark, Kali Linux

Operating Systems: Linux (Administration, File System, Permissions, Process Management, Cron Jobs), Windows

PROJECTS

Enterprise Hospital Cloud Infrastructure — AWS, Docker, Kubernetes, Terraform, CI/CD

- Designed a hybrid-cloud infrastructure that combines on-premises and AWS resources with containerized workloads (Docker, Kubernetes) to deliver high availability and disaster recovery for a hospital-scale environment.
- Automated infrastructure provisioning with Terraform (Infrastructure as Code) and integrated CI/CD, load balancing, auto scaling, VPN, and IAM-based access control to target 99.9% uptime.

Cloud Monitoring Digital Twin — AWS EC2, CloudWatch, EBS, Python, FastAPI, SES

- Built a digital twin that mirrors live AWS EC2 infrastructure, providing a real-time virtual view of system health and performance.
- Used Python, Boto3, and FastAPI to pull CPU, network, and EBS disk I/O metrics from CloudWatch and expose them through a live monitoring API.
- Built an interactive dashboard to visualize infrastructure state and configured automated warning/critical alerts using Amazon SES.

Enterprise Network Design & Simulation — Cisco Packet Tracer, GNS3

- Designed and simulated a multi-layer enterprise network with 8+ routers and switches, segmented into 6 VLANs with inter-VLAN routing to isolate departmental traffic.
- Configured OSPF dynamic routing, DHCP, DNS, NAT, and ACLs across the topology, reducing broadcast traffic and strengthening perimeter security.

Real-Time Network Monitoring & Analysis Dashboard — Python, Wireshark

- Built a Python-based tool that captures and analyzes three core protocol types (TCP, UDP, ICMP) using Wireshark.
- Visualized protocol statistics and traffic patterns on a live dashboard, speeding up identification of network anomalies.

Full-Stack Travel Booking Website — M2 Technologies Internship | HTML, CSS, JavaScript

- Designed and built a fully responsive, multi-page travel booking website with a modern, user-friendly interface.
- Implemented interactive front-end components and consistent responsive layouts across all pages, improving usability across devices.
- Collaborated with a development team through planning, coding, and testing to deliver the project end-to-end within the internship timeline.

INTERNSHIP

Web Development Intern, M2 Technologies — 2026

- Delivered the Full-Stack Travel Booking Website described above, from design through deployment.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

2024 – 2028 | CGPA: 9.16 | Expected Graduation: 2028

CERTIFICATIONS

- Networking Basics (Cisco Networking Academy) — 2026
- Networking Devices and Initial Configuration — 2026
- Introduction to Cloud Computing — 2025
- Introduction to Cyber Security — 2025
- Introduction to Kali Linux Basics — 2026
- Introduction to Artificial Intelligence — 2025
- AI Tools & ChatGPT Workshop — 2025
- Agile Project Management — 2025
- Data Analytics & AI Tools — 2025

ACHIEVEMENTS

- Earned Topper of the Class recognition at the Youth Festival for outstanding academic performance.
- Competed in the CIT Sparkthon Hackathon, a time-bound technology innovation challenge.
- Completed 9 industry-recognized certifications spanning cloud computing, networking, and cybersecurity.
- Built and delivered hands-on technical projects spanning cloud infrastructure, enterprise networking, and full-stack development.
- Maintained a 9.16 CGPA while balancing coursework, certifications, and independent technical projects.

LANGUAGES & CORE COMPETENCIES

Languages: English, Tamil

Core Competencies: Problem Solving, Analytical Thinking, Leadership, Communication, Critical Thinking, Team Collaboration, Adaptability, Time Management, Attention to Detail
