PROFESSIONAL SUMMARY

Goal-driven B.Tech student specializing in **Artificial Intelligence & Data Science** with a clear career objective of becoming a **Cloud Architect**. Experienced in deploying cloud solutions on **AWS**, containerizing applications with **Docker**, and building **CI/CD pipelines** using Jenkins. Currently studying advanced **Computer Networking** — TCP/IP, OSI Model, Subnetting, and Routing — to build rock-solid cloud infrastructure design skills. Holds **29 professional certifications** spanning Cloud, Networking, Security, AI, and DevOps. Recognized as **Class Topper** in AI & Data Science and Hackathon participant at CIT.

CORE COMPETENCIES

Cloud Architecture & Design

Multi-tier architecture, fault tolerance, high availability, scalability on AWS

Network Infrastructure

TCP/IP stack, OSI layers, VLANs, subnetting, routing & switching protocols

DevOps & Automation

Jenkins CI/CD, Docker containers, Git workflows, IaC with Terraform basics

Security & Compliance

AWS IAM policies, network security, ethical hacking concepts, cyber security fundamentals

PROJECTS & IMPLEMENTATIONS

Professional Portfolio Website

2025 – Present

HTML5 · CSS3 · JavaScript · GitHub CI/CD · Responsive Design

- Designed and deployed a full-stack portfolio using modular component architecture, dark-mode UI, CSS animations, and semantic HTML — production-ready and cloud-hosted
- Maintained version control via Git with structured branching and release workflows, mirroring real-world DevOps practices

Git Version Control & DevOps Workflow

2025

Git · GitHub · CLI & GUI Workflows · Repository Management

- Implemented advanced Git workflows: branching strategies, rebase, conflict resolution, and pull request management aligned with enterprise DevOps standards
- Demonstrated proficiency across both command-line git and GUI tools for collaborative, distributed development environments

CIT Hackathon — Rapid Prototype Challenge

2025

Problem Solving · Team Collaboration · Rapid Prototyping

- Competed in a time-bound hackathon at CIT, delivering a functional prototype solution under pressure — demonstrating agile thinking and cross-functional teamwork
